Kedo H1 speaker set. Created mostly out of carbon fiber, and high grade copper and silver components, the Kedo H1 sets have been the additional capability to be Omni-directional, meaning the ability spread out sound in a 360-degree format

The X-1 carbon fiber lounge chair: designed and imported from Italy, was inspired by an aircraft structure. The visual impact of the carbon fiber has deliberately been left exposed, giving the chair a series of reflections that are typical to the material. The core of the chair is made from honeycomb Nomex material, which when combined with the carbon fiber, creates extreme stiffness and a sleek look.

The padded portion of the chair is made from high quality leather and is available in a variety of colors, while the head pillow has a system of regulation in three positions for maximum comfort. The X-1 offers a full-length lounge with a shape your body will form to.

The Kedo K-1 Carbon Fiber Coffee Table . A carbon fiber twill weave covers a lightweight Termanto foam core. Extra-clear grade glass tabletop with thick steel base connecting the body and glass sheet.
